

Scraper Containers – Boxes

IKS offers a wide range of scraper containers/boxes for easy offshore or onshore transport and storage.

The containers are purposely built to fit the scrapers from small to large sizes and even multi-module type scrapers. Containers are equipped with cradle and strapping points to protect the scraper's discs from damage under transport.

IKS designs and delivers special tools for handling scrapers operated in pipelines. The tools can be delivered for a large variety of dimensions and classes and several purposes.
