

## Launching and Retrieving Tools

The safest and fastest way to load and retrieve scrapers in a pipeline. This tool is designed, tested, and manufactured specifically for use in oil and gas pipelines. IKS launching and retrieving tools come into two series; “Light Duty Series” which are made from durable, high strength, and non-spark aluminum applicable for use in small-medium-sized pipelines. For medium-sized pipelines “Heavy Duty Series” is the best option, which is made from durable, high-strength carbon steel treated with anti-spark coating.

### The standard set includes:

- collapsible, height-adjustable wheeled bipod with locking pins and retaining sleeves
- 1- hook and ram with locking pin
- 5- 1.2m long poles with locking pins

### Features & Benefits:

- Limited flexibility ensures hitting the target every time
- Drilled with exacting tolerances for a precision fit
- Additional pole(s) can be utilized for added length
- Collapsible, adjustable wheeled bipod suited for a range of pipeline sizes
- Indexed parts allow the operator to know hook orientation for a trouble-free catch each time
- The most durable and safest tool to use in a natural gas environment.
- Easy to transport
- The most durable and safest tool to use in a natural gas environment.
